#### REPORT OF THE TRUSTEES.

HON. JOHN L. BEVERIDGE, Governor of Illinois.

SIR:—We respectfully submit the second biennial report of the Illinois Southern Hospital for the Insane; covering the period from December 1, 1874, to September 30, 1876. The superintendent's and treasurer's reports are so complete as to make a very full commentary by the trustees unnecessary. We would call your particular attention to that portion of the superintendent's report treating of the expenditure of special appropriations and improvements made. The estimates for special expenditures during the next two years have been carefully considered, and it is hoped that the legislature will make the appropriations herein asked for, without further deduction. The estimate for ordinary expenses is based upon past experience in this hospital, and can be relied upon as being as nearly as possible the sum actually necessary.

The affairs of the hospital have been ably managed by our worthy superintendent, Dr. A. T. Barnes, and he has our cordial endorsement in all that he has undertaken and accomplished.

The defective ventilation of the north wing should be remedied and the patients confined therein secured against the poisonous effects of bad air.

There are defects in the heating appliances, which demand an early remedy, particularly by the substitution of a smaller main steam-pipe for the excessively large one now in use. The means for the extinguishment of fire, asked for by the superintendent, are necessary not only for the preservation of the property of the state, but for the more humane purpose of guarding against the probable loss of life amongst the unfortunate persons confined in the hospital, should fire destroy the buildings. We herewith furnish a list of appropriations needed:—

For ordinary expenses of the hospital, \$9	0,000 per annum\$180,000	)
For the improvement of grounds	2,000	
For finishing road from Anna	2,500	)
For coal-house		)
For carpenter shop		)
Brick barn	4,500	)
Fire-pump and hose		)
Rotary oven		
Dry-closet		)
Improvements and repairs, \$5,000 per ann	ıum 10,000	)
		-
Total for two years	\$206,700	)
Very respectfully,	Amos Clark, <i>President</i> . John C. Boyle, C. Kirkpatrick,	
Anna, Illinois, October 1st, 1876.	$\'Trustees.$	

#### REPORT OF THE MEDICAL SUPERINTENDENT.

To the Board of Trustees.

Gentlemen:—In compliance with an act of the General Assembly, approved April 15th, 1875, I have the honor to present the second biennial report of the hospital, for the twenty-two months ending September 30th, 1876.

At the date of my last report, the first floor of the north wing of the building was unfinished and not occupied by patients; and the centre building being unfinished was not turned over to the trustees by the

commissioners till October 23d, 1875.

The legislature, in 1875, made an appropriation for additional furniture for the first floor of the north wing, and for the centre building, amounting in all to four thousand dollars; this sum was found to be wholly inadequate for those purposes. At that time there was a pressing demand from all parts of the state for further accommodation of patients, and after proper consultation with the board of trustees, it was decided to place the furniture in the building out of ordinary funds; at the same time furnishing the fourth floor of the centre building for patients, giving us additional room for twenty-four more inmates.

The appropriation of two thousand dollars per annum for repairs has been found hardly sufficient, owing to unforeseen accidents. On the 6th day of May, 1876, a gale from the southwest struck the building, doing extensive damage to the slating of the roof, and throwing down eight chimneys, one of which crushed through the roof and the ceiling of the fourth floor of the centre building. The wind also tore off large boards and copper guttering in many places. Windows in almost every part of the north wing and centre building were broken by the flying debris. In effecting repairs, thirty-six squares of slate was consumed, most of it upon the roof of the north wing. The wall of the west front of the building was cracked from top to bottom, and sprung out from five to six inches. I went to Chicago to procure the needed materials for repairs, but being unable to find slate of the required color and size, had to send to Buffalo, N. Y., for this latter article, thereby increasing the cost. I was obliged to send to the city for slaters, paying their railroad fare both ways.

On the second day of July, 1876, a leak occurred in the six-inch pipe laid in the bottom of the embankment of the reservoir, washing away about one-third of the dam. Upon examination, I found the embankment had slid and pulled the pipe apart three or more inches. The tremendous weight of water behind the dam was rushing through so rapidly that something had to be done to save it from destruction. A

sub-marine diver was sent down, and the pipe plugged from the inside of the pond. After this, the embankment was repaired and the base of the dam strengthened, six feet of earth being placed across the whole front.

In January, 1875, the boiler at the pump-house, used for pumping water from the spring and pond to tank on hill, for the use of the hospital, I found to be leaking badly through the upper head; and upon examination I discovered it to be cracked completely across nine flues, the opening ranging from one-sixteenth to one-fourth of an inch. The head was repaired by caulking copper into the crack, and bolting straps across the head. The engineer considered the boiler unsafe in this condition; to have made it safe by repair, would have required an outlay of two hundred and fifty dollars; and then its capacity would not have been sufficient for the work. It was a small upright tubular, with eighteen inches of the flues above the water line. The latter part of February the boiler leaked so badly that we could not make steam enough to run the pump. It was thought best to contract for a new boiler of the following dimensions: forty inches in diameter, fourteen feet long, with four nine-inch flues; costing for boiler six hundred and seventy-five dollars and eighty cents; and for brick-work, pipes and finishing, two hundred and twenty-one dollars and fortyseven cents; making a total cost of eight hundred and ninety-seven A part of the labor was furnished dollars and twenty-seven cents. from the hospital. The boiler was built by John O'Brien and Brother, St. Louis, Mo. I would recommend the sum of five thousand dollars per annum for improvements and repairs, after the south wing is occupied. The last appropriation for improvements and repairs has been overdrawn nine hundred and eleven dollars and thirty cents.

The appropriation for furniture for chapel has been found amply sufficient; after purchasing a good description of furniture, we have a balance from this fund of two hundred and forty-six dollars and twenty-five cents; this latter sum I shall expend in scenery for the stage.

The appropriation of one thousand dollars for a coal-house was thought to be entirely inadequate for the purpose. To have built a temporary one for that money, would have been a waste of material. The board directed me to hold the amount in the state treasury, and ask the legislature for an additional two thousand dollars. The coal-house is a building badly needed. During the past two winters we have labored under great disadvantages for the want of such a structure. The road from Anna being new and formed of surface clay, has been so muddy during the winter season, as to make it difficult of passage for loaded teams, and at times it has been found necessary to use six mules in drawing an ordinary load of coal. With a proper coal-house, having a capacity of seven or eight hundred tons, we could in the fall store a sufficient amount to carry us through the winter.

The appropriation of two thousand dollars for library, musical instruments, and amusements, has been expended in the purchase of piano, billiard table, a library (a choice selection of 600 vols.), a fine magic lantern and photographs for the same, and other matter necessary to the production of an extended series of theatrical entertainments.

The appropriation of two thousand dollars for a road from the town of Anna to the hospital, though insufficient, has been expended as far as it could be made to go. Work was commenced July 3d, 1875, and closed about October 1st following. Three wooden bridges and two culverts were built, and heavy cuts and fills made; the whole now being in very fair condition for use in dry weather. A large amount of the labor upon the road was done by patients. There is a small balance from this appropriation remaining in the state treasury, two hundred and seventy-one dollars and forty-five cents, which could not be used to advantage. To complete this road in a thorough manner, a sum sufficient to macadamize it the whole distance will be needed, and I would ask for that purpose for two thousand, five hundred dollars.

The appropriation of one thousand dollars for a tight board fence has been found sufficient for that purpose. The labor for the manufacture of the posts, and in great part for the erection of the fence, was done by our patients. The fence encloses three airing-courts; one, being in the angle of the building, has two sides fenced, measuring two hundred and twenty-seven and two hundred and ninety feet, and is nine feet in height; the other two, somewhat removed from the bulding, measure together two hundred and twenty-seven by two hundred and ninety feet, and are divided by a partition fence through the centre, all nine feet in height. There is a balance remaning from this appropriation, of three hundred and forty-three dollars and forty-six cents, which could be used to advantage for an airing-court for the patients occupying the south wing.

The appropriation of one thousand, five hundred dollars for a carpenter shop and tools has not been thought enough for the purpose. I have expended four hundred and forty-three dollars and eighty-nine cents for tools urgently needed by the engineer, and have a balance of one thousand and fifty-six dollars and eleven cents, with which to built the shop. If the legislature will allow four hundred dollars additional, I think I could complete the work satisfactorily.

The appropriation of two thousand dollars for improvement of grounds has been drawn upon to a small amount; the unfinished condition of the south wing, and the large quantity of refuse building-material upon the grounds, have interfered with extensive improvement. Cleaveland and French, of Chicago, have been employed to make working plans of the grounds, and as soon as the exterior of the new wing is finished, I shall proceed to carry out the design of the land-scape architects, embracing forty-eight acres of lawn and shrubbery, and about two and a quarter miles of drive and walk. I would recommend an additional appropriation of two thousand dollars for this purpose.

The appropriation of two thousand dollars for stock for farm and for patients' carriage has been used for the designated purposes, and there is a balance remaining in the hands of the state treasurer, amounting to four hundred and seventy-five dollars and ten cents, which will be needed for the purchase of additional milch-eows, upon

completion of the south wing.

The appropriation of two thousand dollars for ice-house and vegetable-cellar was, after suitable plans and specifications had been made, expended as follows: The contract was awarded to A. J. Mosby and

C. E. Craig, at one thousand, seven hundred dollars. The building to be of brick, with stone foundation and slate roof, fifty by twenty-five feet in the clear, the ice-house proper, one story in height; the storage-house, one story, with basement for milk and butter; the cellar, eight feet and six inches high; storage-house, sixteen feet and six inches high; and ice-room, eighteen feet and four inches from top of rock on brick pavement to under side of wall-plate, and twenty-five feet to under side of ridge-rafter, the capacity of the ice-room, about three hundred tons. This building has been completed, and is well-arranged for its intended purposes, and quite ornamental. There is a balance of seventy-nine dollars and fifty cents remaining from this appropriation, which will be used in completing minor details.

The appropriation of one thousand, eight hundred dollars for reservoir at pond has been used, with the exception of a balance of two hundred and seventy-nine dollars and fifty cents, in constructing a reservoir of brick, which only needs a roof and a small amount of grading for its completion. The dimensions are as follows: diameter twenty-four feet, depth twenty-nine feet, walls eighteen inches thick, circular in form. The bottom or floor is substantially formed of concrete and cement. Capacity up to overflow-pipe 51,565 gallons. Being supplied by a spring it affords the best water obtainable, and is

independent of the pond.

For the construction of a pump-house at the pond, we had an appropriation of one thousand dollars. The building has, with the exception of a floor, been completed, and is thirty-six by twenty-five feet, with twelve inch walls, twelve feet in height above stone foundation. The building gives us sufficient room for the purposes intended, and a storage capacity for coal, sufficient to run the pump two or three months. There is twenty-three dollars and seventy-five cents remain-

ing from this appropriation, to be used for flooring.

We very much need a new barn; the old one, even if it were not decayed and in a tumble-down condition, is not large enough for housing our stock and the fodder. And in its present site it is an eye-sore, exposed to view from every point in front of the hospital. I would respectfully suggest that you ask the state legislature for an appropriation for a proper structure of brick. It should be large enough for the accommodation of all the stock, such as horses, cows, hogs, fowls, and carriages; also for the storage of grain and fodder. The cost of such a building would be about four thousand, five hundred dollars.

Our present arrangements for heating consist of two batteries, each containing two boilers, forty inches in diameter, twenty-two feet long, with four nine-inch flues. They were built by A Crozier and Co., St. Louis, Mo. The amount of fire-grate for the four boilers is sixty-four feet. The main steam-pipe is eight inches in diameter, and three hundred and twenty feet long. These boilers have a capacity for heating one million, two hundred and sixty-four thousand cubic feet. With the south wing completed, the following estimate will show the number of cubic feet in whole hospital:

North wing	475,161	cubic	feet.
East extension of north wing	180,320	• 6	4.6
	466,446	4.6	

Centre buildings (front of wings)	119,920	cubic	efeet.
South wing	464,440	"	"
East extension of south wing	79,962	<b>:</b>	"
South " " " "	30,500	44	44.0
Domestic department	127,928		14
Connecting corridor	15,392	4.6	"
Total	1,960,609		
To be deducted for walls	$252,\!535$		
Number of cubic feet to be heated	1,707,534		
Capacity of boilers now in use	1,264,000		
Cubic feet in excess of boiler capacity	433,534		

This clearly shows that with the south wing completed, our present steam capacity will be insufficient to comfortably heat the entire house. I am satisfied that if the eight-inch steam main was removed and a five-inch one substituted, that the boilers would heat a larger number of cubic feet with less fuel than is now used for heating the north wing and centre building. Yet with this change, I doubt if the capacity of the boilers is sufficient to heat the hospital in very cold weather.

The gas apparatus was constructed by the Illinois Pneumatic Gas Company, and the gas is simply air impregnated with gasoline. The whole thing is a nuisance and should be removed, and the building supplied with something better. We can not now properly light the centre building, north wing, and domestic department, and will be unable to afford any light for the south wing.

Unless the board of building commissioners have the means and power under the present law to remedy the defects in the heating and lighting apparatus, it would be well to bring the matter to the notice of the legislature. I am fully satisfied that the steam boilers now in use are not as good as the tubular, and would recommend the substitution of the latter.

Our bake-oven is of the old-fashioned kind, and is a source of frequent trouble and expense in the matter of repairs. Neither is it large enough for our purpose. I would ask that it be replaced with

one of Vale's rotary ovens, at a cost of one thousand dollars.

The dry-closet, now in use, has an area of one thousand, five hundred and twenty-one cubic feet, and is supplied with seventeen one-inch return bend coils, with thirty-three and three-quarter feet in each, making in all five hundred and seventy-three and three-quarter feet of coil. This is not sufficient for the work it has to do, and with the south wing occupied, I hardly see how we are to get along. The drying-closet and ironing-room are just under the domestics' dormitories, and during the summer keep the sleeping-rooms so warm that we find it impossible to use them; thereby compelling us at that time to transfer the domestics from these rooms to the centre building. In order to obviate this difficulty, I propose to make an addition to the corridor, connecting the domestic department with the centre building, and convert the basement into a drying-closet, and the upper story into an ironing room.

Since the last report we have had two or three very narrow escapes The last one occurred a short time since, by spontaneous combustion, in the fourth floor near one of the wooden elevators, and when discovered by the night-watch, was just making its way through the ceiling into the roof. The fire was extinguished by a small hose and pipe upon that floor; but if the fire had not been discovered just at that time, all the appliances we now have could not have saved the buildings. I believe it would be the part of wisdom, considering the large amount of money the state has invested in the hospital, to take measures to guard against an accident of this kind. The following is carefully prepared estimate of the amount necessary for such purpose. A Crane Brothers' Duplex Fire Pump, with suction-pipe, dischargevalves, couplings and fittings, all put up complete and in working order, together with five hundred feet of hose, \$1,800.

The south wing promises to be in every respect superior to the north wing, both in architectural beauty and utility. When the building is completed it will give us room for about two hundred and forty more patients, together with our present number, and by crowding, will give us accommodation for four hundred and eighty. I am inclined to the opinion that if the contractor uses proper industry, the floors of the south wing may be ready for use by early spring, and the entire wing by July 1st, 1877.

With the amount of money we now have on hand, I think we shall be able, with one hundred additional patients, to pull through to the tirst of July, without asking the legislature for more money.

Taking the last three months, with a daily average of 238.35 patients, as a basis of calculation, I should judge that the hospital will require for the next two years, on ordinary expense account, the sum of ninety thousand dollars per annum, estimating its capacity at four hundred and eighty patients.

Your attention is respectfully called to the itemized statement of purchases on special and ordinary appropriations, for the ten months ending Sept. 30, 1875, and for the twelve months ending September 30, 1876; also the statements of products of the farm and garden, and

the amount of property on hand.

When the state was districted by the legislature our quota was estimated for the capacity of the hospital, at that time. I think it might be well, in view of our extended room, for the state to be re-districted. We find great trouble in getting counties to pay their indebtedness to the hospital. The law in relation to furnishing pauper patients with clothing seems to be in such a shape that no two counties understand it alike, and the result is that we have great trouble in collecting bills, some counties paying willingly, others not paying at all, and some insist upon payment in county orders. We send bills every three months and urge prompt payment, but at the end of each year we have large amounts standing out. Should counties pay in county orders, they would insist upon acceptance at par, a thing the state cannot very well afford to do, especially when the clothing is charged at about its cost. Some county orders are worth their par value, others are not worth fifty cents on the dollar. Taking the large number of counties represented in our hospital, it is almost impossible for me to tell what orders are worth in each county. To allow one county to

pay in cash and another county to pay in county orders, would hardly be treating all the counties alike, and would in no sense be just to the state. I should be glad if the legislature would make the law so plain that every county would be compelled to settle their accounts with the hospital promptly; or have the state assume the care of the

pauper insane.

There were two hundred and forty-nine patients admitted to the house since last report, about eighteen per cent. coming from other The disease in nearly forty per cent. of those admitted was chronic, and a large proportion of the whole number came to us from county-houses and jails. Of this latter class many were emaciated and anemic to the last degree, and in a condition when slight attacks of acute disease would almost certainly result in death. During the winter of 1875 and 1876, we had an epidemic of erysipelas, and in the summer and autumn of the present year, many cases of dysentery of low form. Intermittent fever has largely prevailed during the spring and fall months, which is perhaps in a measure due to the extensive excavations and denudations of the surface about the buildings. I have no doubt that the defective ventilation of the halls and sleeping rooms of the north wing has exercised a very deleterious influence upon our patients, and has increased the mortality.

Amusements and recreation for the patients have received due of

# ADDENDUM.

Since sending this report to the press, John L. Pierson, Esquire, of New York, has, through Dr. Mercer, presented this Hospital with 79 bound volumes of entertaining literature; 45 chromo lithographs, of large size; a stereoscope and views, and a number of Bibles, Testaments, singing books, atlases and illustrated newspapers. very liberal contribution came to us most acceptably, and the donor's kindness is felt here, as it has been in almost every similar institution throughout the country.

A. T. BARNES.

Superintendent.

Since the last report we have had two or three very narrow escapes from fire. The last one occurred a short time since, by spontaneous combustion, in the fourth floor near one of the wooden elevators, and when discovered by the night-watch, was just making its way through the ceiling into the roof. The fire was extinguished by a small hose and pipe upon that floor; but if the fire had not been discovered just at that time, all the appliances we now have could not have saved the buildings. I believe it would be the part of wisdom, considering the large amount of money the state has invested in the hospital, to take measures to guard against an accident of this kind. The following is carefully prepared estimate of the amount necessary for such purpose. A Crane Brothers Duplex Fire Pump, with suction-pipe, discharge-valves, couplings and fittings, all put up complete and in working order, together with five hundred feet of hose, \$1,800.

The south wing promises to be in every respect superior to the north wing, both in architectural beauty and utility. When the building is completed it will give us room for about two hundred and forty more patients, together with our present number, and by crowding, will give us accommodation for four hundred and eighty. I am inclined to the opinion that if the contractor uses proper industry,

ers are not worth fifty cents on the dollar. Taking the large number of counties represented in our hospital, it is almost impossible for me to tell what orders are worth in each county. To allow one county to

pay in each and another county to pay in county orders, would hardly be treating all the counties alike, and would in no sense be just to the state. I should be glad if the legislature would make the law so plain that every county would be compelled to settle their accounts with the hospital promptly; or have the state assume the care of the

pauper insane.

There were two hundred and forty-nine patients admitted to the house since last report, about eighteen per cent. coming from other The disease in nearly forty per cent. of those admitstate hospitals. ted was chronic, and a large proportion of the whole number came to us from county-houses and jails. Of this latter class many were emaciated and anemic to the last degree, and in a condition when slight attacks of acute disease would almost certainly result in death. During the winter of 1875 and 1876, we had an epidemic of erysipelas, and in the summer and autumn of the present year, many cases of dysentery of low form. Intermittent fever has largely prevailed during the spring and fall months, which is perhaps in a measure due to the extensive excavations and denudations of the surface about the build-I have no doubt that the defective ventilation of the halls and sleeping rooms of the north wing has exercised a very deleterious influence upon our patients, and has increased the mortality.

Amusements and recreation for the patients have received due attention, and in cases where it has been considered beneficial, they have been encouraged to perform some light labor upon the farm or within

doors.

To Dr. F. A. Mercer, the senior assistant physician, all praise is due for good judgment, sympathetic feeling, and energy in the care of the patients of both sexes. He has my thanks for the able manner in

which he has discharged his varied duties.

Mr. Charles M. Olmsted, the clerk, has been untiring in the performance of the duties pertaining to his responsible position, and to him my thanks are due; as also to Mrs. Douglas, our matron; Captain Fulton, the engineer; Mrs. Cole, and Mr. Whitten, the supervisors; and gentlemen of the Board of Trustees, to you I owe more than I can express; your able counsel has been my best and constant guide.

Very respectfully yours,

A. T. BARNES,

Superintendent.

## CHAPTER 85 REVISED STATUTES 1874, PAGE 681, ENTITLED "LUNATICS."

#### AN ACT

TO REVISE THE LAW IN RELATION TO THE COMMITMENT AND DETENTION OF LUNA-TICS, APPROVED MARCH 24, 1874, IN FORCE JULY 1, 1874.

Petition. § 1. Be it enacted by the People of the State of Illinois, represented in the General Assembly, That when any person is supposed to be insane or distracted, any near relative, or in case there be none, any respectable person residing in the county, may petition the judge of the county court for proceedings to inquire into such alleged insanity or distraction. For the hearing of such application and proceedings thereon, the county court shall be considered as always open.

WRIT—SERVICE.] § 2. Upon the filing of such petition, the judge shall order the clerk of the court to issue a writ, directed to the sheriff or any constable, or the person having the custody or charge of the alleged insane or distracted person, unless he shall be brought before the court without such writ, requiring the alleged insane person to be brought before him at a time and place to be appointed for the hearing of the matter. It shall be the duty of the officer or person to whom the writ is directed to execute and return the same, and bring the alleged insane person before the court as directed in the writ.

Subpenas. § 3. The clerk shall also issue subpenas for such witnesses as may be desired on behalf of the petitioner, or of the person alleged to be insane, to appear at a time fixed for the trial of the matter.

JURY—TRIAL.] § 4. At the time fixed for the trial, a jury of six persons, one of whom shall be a physician, shall be impaneled to try the case. The case shall be tried in the presence of the person alleged to be insane, who shall have the right to be assisted by counsel, and may challenge jurors as in civil cases. The court may, for good cause, continue the case from time to time.

VERDICT—FORM.] § 5. After hearing the evidence the jury shall render their verdict in writing signed by them, which shall embody the substantial facts shown by the evidence, which verdict may be substantially in the following form:

STATE OF ILLINOIS, ss.

VERDICT RECORDED---ORDER OF COMMITTAL---APPLICATION. Upon the return of the verdict, the same shall be recorded at large by the clerk, and if it appears that the person is insane, and is a fit person to be sent to a state hospital for the insane, the court shall enter an order that the insane person be committed to a state hospital for the insane, and thereupon it shall be the duty of the clerk of the court to make application to the superintendent of some one of the state hos-

pitals for the insane for the admission of such insane person.

To which hospital---application, etc.] § 7. If such insane person is a pauper, the application shall be first made to the nearest hospital, but if he be not a pauper, application shall be made to such one of the state hospitals for the insane as the relatives or friends of the patient shall desire. In any case, if, on account of the crowded condition of any one of the hospitals, or for other good reason, the patient cannot be received therein, or it is not desirable to commit him thereto, he may be committed to any other of said hospitals. Upon receiving any such application, the superintendent shall immediately inform the clerk whether the patient can be received, and if so, at what time; and if not, shall state the reason why.

WARRANT TO COMMIT.] § 8. Upon receiving notice at what time the patient will be received, the clerk shall, in due season for the conveyance of the person to the hospital by the appointed time, issue a warrant directed to the sheriffor any other suitable person, preferring some relative of the insane person when desired, commanding him to arrest such insane person and convey him to the hospital; and if the clerk is satisfied that it is necessary, he may authorize an assistant to

be employed.

Form of warrant. \ \§ 9. The warrant may be substantially as follows:

Clerk of the county court, ...... county. Indorsement---return.] § 10. Upon receiving the patient, the superintendent shall indorse upon said warrant a receipt as follows:

Northern (or as the case may be) Illinois Hospital for the Insane. Received this ........ day of ......, A. D. ......, the patient named in the within warrant.

Superintendent.

This warrant, with a receipt thereon, shall be returned to the clerk,

to be filed by him with the other papers relating to the case.

Who not admitted---idiots discharged.] § 11. No person having any contagious or infectious disease, and no idiot, shall be admitted to either of the state hospitals. When the trustees and superintendent shall find that an idiot has been received into the hospital, they may discharge him.

TEMPORARY COMMITMENT.] § 12. If the court shall deem it necessary, pending proceedings and previous to verdict, or after verdict and pending admission into the hospital, temporarily to restrain of his liberty the person alleged to be insane, then the court shall make such order in that behalf as the case may require, and the same being entered of record, a copy thereof certified by the clerk shall authorize

such person to be temporarily detained by the sheriff, jailer or other

suitable person to whom the same shall be directed.

and is found by the jury not to be insane, the costs of the proceeding, including the fees of the jury, shall be paid by the petitioner, and judgment may be awarded against him therefor. If such person is found to be insane, such costs shall be paid by his guardian, conservator, or relatives, as the court may direct. If the person alleged to be insane is a pauper, the costs of the proceeding, including the fees of the jury, shall be paid out of the county treasury: Provided, if such pauper is found not to be insane, the court may, in its discretion, award the costs against the petitioner.

WHO TO PAY EXPENSES—SHERIFF'S FEES. § 14. The expense of conveying a pauper to the hospital shall be paid by the county in which he resides, and that of any other patient by his guardian, conservator or relatives; and in no case shall any such expense be paid by the state, or out of any funds for the insane. The fees of the sheriff for conveying any person to a hospital, shall be the same as for

conveying convicts to the penitentiary.

BOND TO FURNISH CLOTHING, ETC. \ \ 15. If the person be not a pauper, then one or more persons, relatives or friends of the patient shall, upon his admission into the hospital, become responsible to the trustees for finding the patient in clothes, and removing him when required; and shall execute a bond conditioned as follows, viz:

Witness our hands and seals, this ....... day of ....... A. D.......

CLOTHING.] § 16. The clothing to be furnished each patient upon being sent to the hospital, shall not be less than the following: For a male, three new shirts, a new and substantial coat, vest, and two pairs of pantaloons of woolen cloth, three pairs of woolen socks, a black or dark stock or cravat, a good hat or cap, and a pair of new shoes or boots, and a pair of slippers to wear within doors. For a female, in addition to the same quantity of undergarments, shoes and stockings, there shall be two woolen petticoats or skirts, three good dresses, a cloak or shawl, and a decent bonnet. Unless such clothing be delivered in good order to the superintendent, he shall not be bound to receive the patient.

PAUPERS—COUNTY TO FURNISH CLOTHING, ETC.] § 17. If the insane person be a pauper, it shall be the duty of the judge of the county court to see that he is furnished with the necessary amount of substantial clothing at the time he is sent to the hospital, and from time to time while he remains a patient in the hospital, and that he be removed therefrom when required by the trustees; the expense of such clothing and removal shall be paid out of the county treasury,

upon the certificate of the judge of the county court.

Discharge of Patient—Notice—Removal.] § 18. Whenever the trustees shall order any patient discharged, the superintendent shall

at once notify the clerk of the county court of the proper county thereof, if the patient is a pauper, and if not, shall notify all the persons who signed the bond required in section 15 of this act, and request the removal of the patient. If the patient be not removed within thirty days after such notice is received, then the superintendent may return him to the place from whence he came, and the reasonable expense thereof may be recovered by suit on the bond, or in

case of a pauper, shall be paid by the proper county.

Non-resident patients.] § 19. Whenever application shall be made for a patient not residing within the state, if the superintendent shall be of opinion that from the character of the case it is probably curable, and if there be at the time any room in the hospital, the trustees, in their discretion, may order the patient to be admitted, always taking a satisfactory bond for the maintenance of the patient, and for his removal when required. The rate of maintenance in such cases shall be fixed by the trustees, and two months' pay in advance shall be required. But no such patient shall be detained without the order of a court of competent jurisdiction, or a verdict of a jury.

shall be restored to reason, he shall have the right to leave the hospital at any time, and if detained therein contrary to his wishes after such restoration, shall have the privilege of a writ of habeas corpus at all times, either on his own application, or that of any other person in his behalf. If the patient is discharged on such writ and if it shall appear that the superintendent has acted in bad faith or negligently, the superintendent shall pay all the cost of the proceeding. superintendent shall moreover be liable to a civil action for false imprisonment.

County Hospital.  $\S 21$ . This act shall not be construed to prevent the committing of any insane pauper to the hospital for the insane of the county in which he may reside, where such a hospital is pro-

vided.

TRIAL BY JURY NECESSARY.] § 22. No superintendent, or other officer or person connected with either of the state hospitals for the insane, or with any hospital or asylum for insane or distracted persons in this state, shall receive, detain or keep in custody, at such hospital or asylum, any person who shall not have been declared insane by the verdict of a jury, and authorized to be confined by the order of a court of competent jurisdiction; and no trial shall be had of the question of the sanity or insanity of any person before any judge or court,

without the presence of the person alleged to be insane.

Penalty.] § 23. If any superintendent, or other officer or person connected with either of the state hospitals for the insane, or with any hospital or asylum for insane or distracted persons, in this state, whether public or private, shall receive or detain any person who has not been declared insane by the verdict of a jury, and whose confinement is not authorized by the order of a court of competent jurisdiction, he shall be confined in the county jail not exceeding one year, or fined not exceeding \$500, or both, and be liable civilly to the person injured for all damages which he may have sustained; and if he be connected with either of the insane hospitals of this state, he shall be discharged from service therein.
